

Animal Healing NOW[®]

Est. 2006

Patient Referral Form

Dr. Savko is a PA licensed doctor of chiropractic with certification and vast experience working with animals. Since 1999 he has affiliated with licensed veterinarians to help enhance the quality of care. Currently he works in house at several veterinary hospitals across the region. **We do not do chiropractic manipulations.** Our work uses gentle, yet precise instrumental stimulation of neurologic and muscular "trigger" points throughout the body. Our goal is to find and reduce or remove imbalance in the body's natural communication and support systems thus reducing pain, and inducing healing. All accomplished incredibly safely and easily, which allows for far more comprehensive, long lasting, and deeper effects than many other natural techniques and modalities alone.
