### Patient Referral Form

Pittsburgh native, Dr. Michael G. Savko is a PA licensed and board certified doctor of chiropractic. He is also certified (since 2006) in the incredible VOM healing techniques for animals. Please note, he is not a veterinarian, nor does he practice veterinary medicine. For over 18 years he has worked with veterinarians to help enhance the quality of care for large and small animals. Currently, Dr. Savko works in house, under the direct supervision of licensed veterinarians at several prestigious veterinary hospitals across the region. **Dr. Savko does not do and will not do a manipulation of the spine or extremities**, his work, uses gentle and precise instrumental stimulation of nerve and neuromuscular energetic points all over the body to find and remove imbalance in the body's natural communication systems. Our goal is to naturally, and non invasively, re-establish communication and balance in the affected areas thus reducing pain and inducing healing. All accomplished in an exceptionally safe and gentle manner which allows for far more comprehensive, long lasting, and deeper effects that many other techniques alone. So far the results have been nothing short of INCREDIBLE!
