

Animal Healing NOW[®]

Est. 2006

Dr. Savko is a Pennsylvania licensed doctor of chiropractic with certification and vast experience working with animals. Since 1999 he has affiliated with licensed veterinarians to help enhance the quality of care. Dr. Savko and his associate, Dr. Smiesko are part of the team at several regional veterinary hospitals. Our one of a kind approach is closer to comprehensive bodywork and acupressure than it is to traditional "animal chiropractic". Essentially the work is done by quick, gentle, and precise stimulation to the nervous system at specific points throughout the body. We use handheld instruments that can be dialed up or down from a kitten to a Clydesdale. The method is inherently safe and it will either help or not. It cannot cause harm. If we can help remove imbalances and improve brain-body communication we hope to reduce pain and improve function. All of our work is accomplished incredibly safely and easily, which allows for more comprehensive, longer lasting, and deeper results than many other natural techniques and modalities alone.
